Velora Studio

Privacy Policy & Terms · Last updated: 11 November 2026

What Velora Studio is

Velora Studio is a personal tool used by its owner (Faisal Majeed) to upload his own short videos to his own YouTube channels on a schedule. It is not offered to the public.

Information we access

- When a channel owner connects a YouTube channel, Google gives the app permission to upload videos (`youtube.upload`) and to read the channel's basic details such as its name and picture (`youtube.readonly`).
- The app stores a login token for each connected channel. Tokens are encrypted with the owner's password and kept in the owner's private settings file.

How information is used

Information from Google is used only to upload the owner's videos to the owner's channels and to show which channels are connected. It is never sold, shared with third parties, used for advertising, or used to train AI models.

Google API Services

Velora Studio's use of information received from Google APIs adheres to the Google API Services User Data Policy, including the Limited Use requirements. Uploads follow the YouTube Terms of Service and Google Privacy Policy.

Removing access

Access can be removed at any time from the app (Channels → Remove) or from your Google Account at myaccount.google.com/permissions. Removing a channel deletes its stored token.

Terms of use

The tool is provided as-is for the owner's personal use. Each user is responsible for uploading only content they own or have the right to publish, and for following YouTube's rules.
